1: The $387,000 YouTube Video

YOUTUBE BUSINESS CASE BUILDER

a prompt

01 STEP
WHY THIS MATTERS

Before you create a single video, I want you to understand the potential ROI for your specific business. Not in theory. In real numbers. Copy this prompt into ChatGPT or Claude and fill in the brackets with your information.

02 STEP
THE PROMPT

I'm a [YOUR PROFESSION] in [YOUR CITY/MARKET].

My average transaction/client value is $[AMOUNT].

My current conversion rate from lead to client is approximately [X]%.

Help me calculate:

- If I create one video per week and each video generates an average of 2 leads per month after 6 months, what's my potential annual revenue from YouTube?

- What is my 'YouTube Hourly Rate' if each video takes 2 hours to create?

- Compare this ROI to my current marketing methods (cold calling, paid ads, networking events).

- What's the 3-year compound value if my videos continue generating leads indefinitely?

Be specific with numbers. Show your math.

03 STEP
HOW TO USE

- Copy the entire prompt above.
- Paste into ChatGPT, Claude, or Gemini.
- Replace the bracketed placeholders with your real info.
- Run it. Read the output. Iterate as needed.

04 STEP
MAKE IT YOURS

- Run it twice. First with conservative numbers, second with optimistic. Compare the spread.
- Add one constraint specific to your business and ask the AI to factor it in.
- Ask the AI to challenge its own answer. 'What's the strongest argument against this output?'
- Save the best output. Re-run the same prompt every quarter and watch the answer evolve as your business grows.

05 STEP
AARON'S NOTE

> *This exercise gives you a concrete number you can return to whenever you're tempted to skip a week of content. When you know each video is worth $5,000 or $10,000 or $50,000 over its lifetime, carving out two hours a week stops feeling like a sacrifice and starts feeling like the smartest investment you'll make all month.*

YOUTUBE STRATEGY MYTH AUDIT

01 STEP
WHY THIS MATTERS

Here's a prompt you can use right now to audit whether your current YouTube strategy is built on bad advice. If you haven't started yet, run this with your planned strategy and catch the mistakes before you make them.

02 STEP
THE PROMPT

I'm a [YOUR PROFESSION] in [YOUR MARKET] planning my YouTube strategy. Here's what I'm currently doing or planning to do:

- Posting frequency: [X times per week]

- Average video length: [X minutes]

- Primary goal metric: [subscribers/views/other]

- Content approach: [describe your topics]

- Equipment budget: [$ amount]

Based on current YouTube algorithm behavior in 2026, audit this strategy for common myths and mistakes.

Specifically flag if I'm:

- Prioritizing volume over quality
- Chasing vanity metrics instead of watch time and retention
- Over-investing in equipment before validating my content strategy
- Making videos too short to build authority

- Targeting broad/viral topics instead of searchable niche content
- Blaming the algorithm instead of optimizing titles, thumbnails, and hooks

Give me a revised strategy that avoids these traps.
